

Anatomics[®] 

Quality Surgical Solutions

SkullPro®

Patient-Matched

Options for covering skull defects after craniectomy are usually limited to unsuitable sports helmets. Anatomic has pioneered SkullPro® as a slim, patient matched and contoured alternative to provide an aesthetic cover for skull deformity. SkullPro® has a thin, tough nylon shell selected to cover an individual patient's skull defect. The shell sits inside a washable and hypoallergenic fabric pocket which is then held in place with a breathable mesh band or beanie. SkullPro® offers patients a superior and hygienic alternative to sports helmets.

The Benefits of SkullPro®

Coverage

Anatomics SkullPro® has a thin, tough nylon shell shaped to appropriately cover the patient's skull defect.

Comfort

The nylon shell sits inside a washable, comfortable and hypoallergenic fabric pocket and is held in place by a breathable Mesh Band or Beanie.

Contour

Anatomics has worked with neurosurgeons and patients to scientifically design SkullPro®, ensuring the right mix of comfort and contour for every patient's head size and shape.

Low Profile

Anatomics SkullPro® is a low profile device that will facilitate other headgear such as a hat, wig or helmet.

Compliance

Anatomics SkullPro® offers patients a superior and hygienic alternative to sport helmets that may reduce feelings of self-consciousness, reduce the incidence of pressure sores and improve wearing compliance.

Complex Option Available

For the ultimate in comfort, Anatomics offers a fully custom fitting service. Using anatomical data derived from a CT scan, Anatomics can design and manufacture a precise, form-fitting SkullPro® using advanced 3D modelling software and the latest in 3D printing technology for even the most complex and unusual defects.

Note:

- SkullPro® is provided in a patient-matched kit that includes both Beanie and Mesh.
- Please review Practitioner and Patient Information Guide for assembly and fitting instructions.
- Please review Instructions For Use for more details, contraindications, and cleaning instructions.
